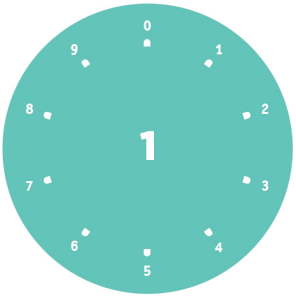
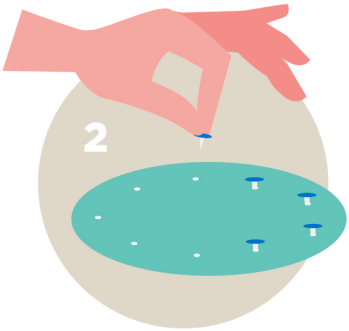
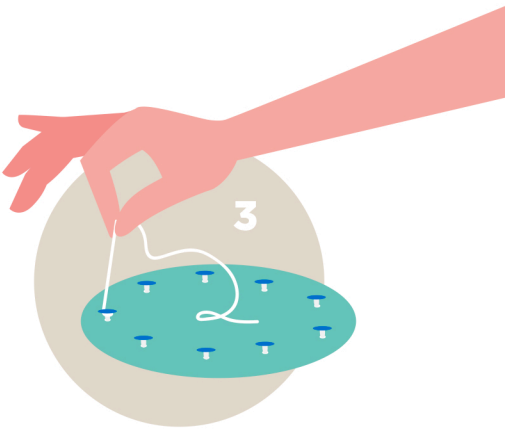
MONTESSORI's multiplication table wheel



1 Cut the circle below and stick it to a cardboard base.



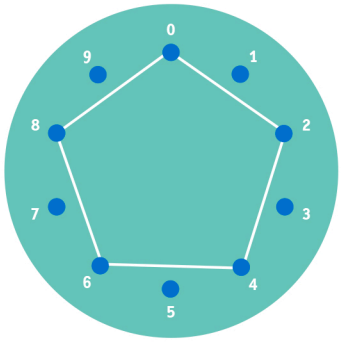
2 Take 9 drawing pins and carefully fix them on the withe points close to the numbers.

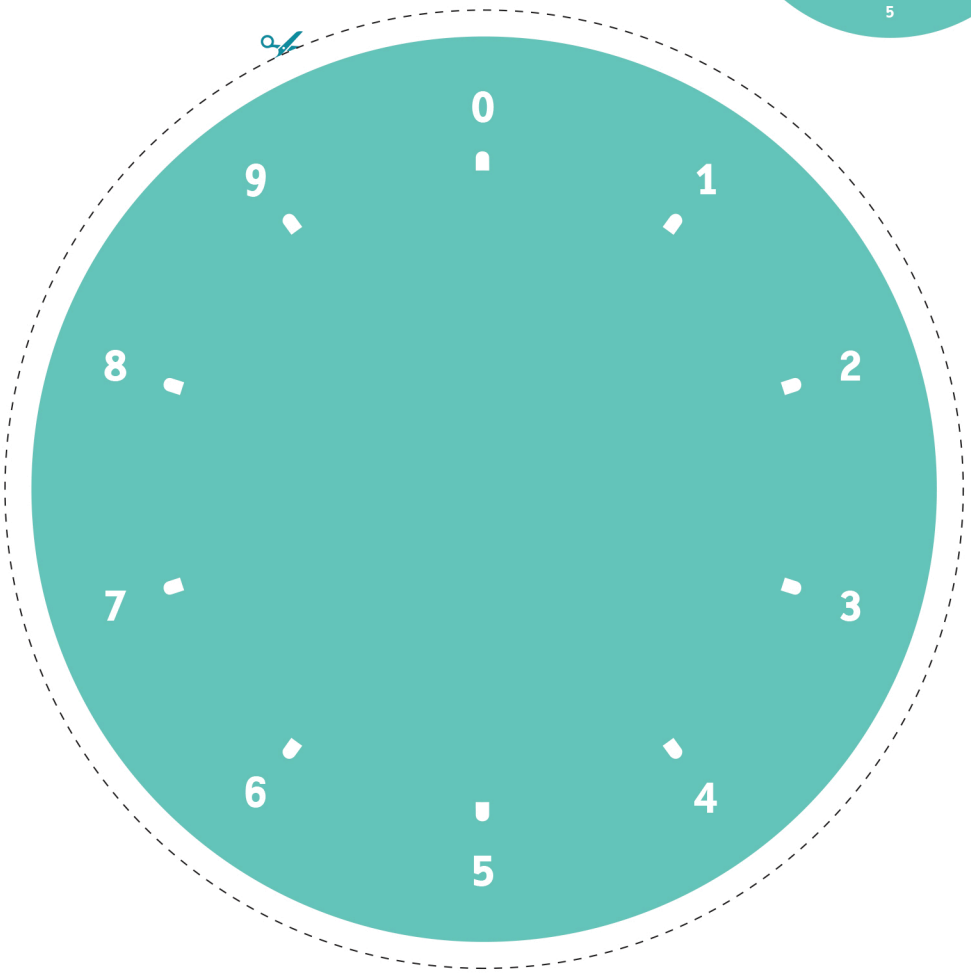


3 Take a thread and tie it to the drawing pins corresponding to the number 0.

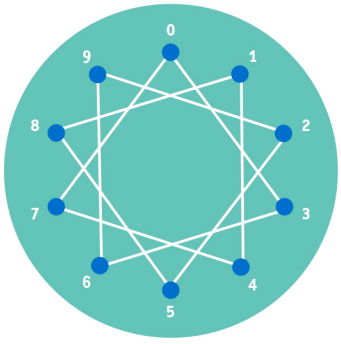
Multiplication table of 2

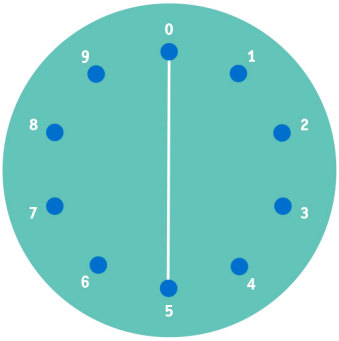
For learning the multiplication tables of 2 count two pins starting from 0 clockwise and tie the thread around the pin corresponding to the number 2. Count two more and tie the thread around the 4, count two more and tie it around 6, and so on until you reach again the 0 (that corresponds to the 10). What do you see? You created a geometrical shape that you can relate to the multiplication table of 2.





Multiplication table of 3





What table is it?
